EXPERIENCE

Software Engineer (Full Stack) | *Webwrite Inc. (Lahore, PK)*   May 2023 – Present

- Developed and maintained highly performant web application user interfaces improving customer satisfaction.
- Implemented secure and scalable Node.js back-ends consisting of efficient databases ensuring faster API responses.
- Enforced HIPAA compliance (medical apps) and robust authentications (OAuth, JWT, MFA) for improved security.
- Optimized AWS cloud infrastructure (VPC, CloudFormation, EC2, S3, and IAM) for efficient resource utilization.
- Collaborated with CI/CD team for streamlined deployments and controlled fault-tolerant releases.
- Conducted domain-specific training and mentored junior team members for skill development.

Software Engineer | *Digital Dynamics* (Remote)   August 2023 – April 2024

- Built web apps using cutting-edge technologies (Next.js, React, Node.js) and databases (MongoDB, PostgreSQL).
- Integrated payment options (Stripe, Paypal, Square), and implemented KYC verification for financial applications.
- Leveraged cloud services (AWS and Azure) and utilized monolithic, and serverless (AWS Lambda) architectures.
- Contributed to the development of various UI components and APIs for new features improving experience.

Intern, MERN Stack Developer | *Webwrite Inc. (Lahore, PK)*   March 2023 – May 2023

- Developed an immersive e-commerce experience using Next.js, and implemented Node.js API integration,
- Wrote documentation for various medical systems and wrote unit tests ensuring stable builds.

RECENT PROJECTS

Partikarte - Online Events Booking and Management System
- Built a powerful multi-vendor online event management platform. It streamlines events management, empowers vendors to manage their businesses, and offers a user-friendly ticketing system with secure payment integrations like Stripe and Bankart.si.

American Clinic Online - Patient Booking & E-Hospital Management System
- Developed a secure HIPAA-compliant telehealth platform using the MERN stack. It allows for online consultations with video chat, messaging, and notifications. Ensured efficient deployment on AWS and reliable system maintenance through fault-tolerant CI/CD pipeline.

FightLife - Personalized Fitness Platform
- Implemented a feature-rich fitness app featuring real-time chat, appointment scheduling, and secure payments, fostering a strong user community. The app's workout tracking system and trainer-focused calendar interface empower personalized coaching and improve client outcomes.
